**Module 3** Solving Linear Equations  
of One Variable  
**Lesson 3** Solving One-Step Linear Equations

**guided  
practice**

**Set 1**

1. Solve:  $3x = 9$

2. Solve:  $\frac{r}{7} = 6$

3. Solve:  $5x = 20$

4. Solve:  $\frac{n}{3} = 9$

**Set 2**

1. Solve:  $p + 3 = 4$

2. Solve:  $y - 8 = 10$

3. Solve:  $A - 2 = 5$

4. Solve:  $t + 7 = 13$

**Manipulative Set**

Solve each equation using manipulatives.

1.  $m + 5 = 8$

2.  $r + 2 = -6$

3.  $4s = 16$
