Module 3 Solving Linear Equations
of One Variable
Lesson 5 Solving Multi-Step Linear Equations

**guided
practice**

Set 1

1. Solve: $4R - 1 = 2R + 9$

2. Solve: $5z + 7 = 4z + 3 + z$

3. Solve: $8G + 6 = 1 - 2G$

Set 2

1. Solve: $3(h - 4) = -18$

2. Solve: $5\left(2w - \frac{3}{5}\right) = w + 6$

3. Solve: $-\frac{3}{4}x + 1 = \frac{1}{8}x + \frac{3}{10}$

Manipulative Set

Solve each equation using algebra tiles.

1. $6x - 5 = -17$

2. $4x + 3 = x + 12$
