## 12.1

NAME \_\_\_\_\_

Module 12 Attributes and Tools  
Lesson 1 Measurement Systems

Compare each amount using  $<$  or  $>$ .

- |  |  |
|--|--|
| 1. One gal is _____ the milk used in a bowl of cereal .<br>$>$ | 2. One mL is _____ the amount of water in a birdbath.<br>$<$ |
| 3. One kg is _____ the mass of a horse.<br>$<$                 | 4. The length of a banana is _____ 1 cm.<br>$>$              |
| 5. The water in a full bathtub is _____ 1 pt.<br>$>$           | 6. One lb is _____ the weight of a ladybug.<br>$>$           |

Fill in the blank.

- |                                   |                                  |
|-----------------------------------|----------------------------------|
| 7. 1 _____ = 0.01 hL<br><b>L</b>  | 8. _____ in. = 1 yd<br><b>36</b> |
| 9. 1 kg = _____ g<br><b>1,000</b> | 10. 1 cm = _____ mm<br><b>10</b> |

Choose the most reasonable customary unit of measure.

- |   |                             |
|---|-----------------------------|
| 11. The height of a basketball net      | <b>Feet or yards</b>        |
| 12. The weight of a cell phone          | <b>Ounces</b>               |
| 13. The amount of water in a tea kettle | <b>Fluid ounces or cups</b> |

Choose the most reasonable metric unit of measure.

- |                                   |                             |
|-----------------------------------|-----------------------------|
| 14. The mass of a bowling ball    | <b>Kilograms</b>            |
| 15. The length of a soccer field  | <b>Meters or dekameters</b> |
| 16. The amount of water in a lake | <b>Kiloliters</b>           |
